

## Press Release

### Balance of Payments (BOP) Performance During Q1 2023/2024

During the first quarter (July/September 2023) of FY 2023/2024, transactions of the Egyptian economy with the rest of the world unfolded an overall BOP surplus of US\$ 228.8 million (against an overall surplus of US\$ 523.5 million during the corresponding period a year earlier), as the current account\* deficit improved by 12.1 percent, reaching only US\$ 2.8 billion (compared with US\$ 3.2 billion). This was owing mainly to the retreat in the trade deficit by 12.7 percent, to just US\$ 7.9 billion, and the rise in services surplus to US\$ 5.2 billion, driven by the increase in both the Suez Canal transit receipts and tourism revenues. The capital and financial account also recorded a net inflow of US\$ 1.8 billion, with foreign direct investment in Egypt registering a net inflow of US\$ 2.3 billion, while portfolio investments in Egypt continued to achieve a net outflow of US\$ 523.4 million.

#### **The following factors contributed to the decline in the current account deficit:**

- **Non-oil trade deficit improved** by US\$ 2.4 billion, reaching just US\$ 6.6 billion (compared with US\$ 9.0 billion), mainly reflecting the retreat in non-oil merchandise imports by US\$ 1.9 billion, as shown below:
  - **Non-oil merchandise imports dropped** by 12.5 percent, to only US\$ 13.3 billion (compared with US\$ 15.3 billion). The drop concentrated in corn, propylene polymers, organic and inorganic compounds.
  - **Non-oil merchandise exports increased** by US\$ 458.9 million, to US\$ 6.7 billion (compared with US\$ 6.3 billion), reflecting mainly higher exports of wires and cables; fresh, frozen, or cooked vegetables; gold; and electrical household appliances.
- **Transport receipts increased** by 13.5 percent, reaching US\$ 3.5 billion (compared with US\$ 3.0 billion), as a main result of the increase in the Suez Canal transit receipts by 19.4 percent to US\$ 2.4 billion (against US\$ 2.0 billion), driven by the pickup in both the net tonnage of vessels by 8.2 percent to 403.1 million tons and the number of passing vessels by 4.3 percent.

---

\* Including merchandise and services transactions, income from factor costs, private transfers, including remittances of Egyptian workers abroad, and official transfers including governmental in-kind and cash grants.

- **Tourism revenues rose** by 9.3 percent to record US\$ 4.5 billion (from US\$ 4.1 billion), due to the pickup in the numbers of both tourist nights by 9.3 percent to 47.7 million, and tourist arrivals to Egypt by 23.2 percent to register 4.2 million.

**The factors that curbed the improvement of the current account:**

- **The deficit of oil trade balance widened** by US\$ 1.2 billion to US\$ 1.3 billion (against US\$ 106.0 million), primarily due to the decline in oil exports, as shown below:
  - **Oil exports went down** by US\$ 2.1 billion to only US\$ 1.6 billion, on the back of the decrease in the exports of natural gas by US\$ 2.0 billion and oil products by US\$ 393.8 million (due to the decline of the exported quantities and the global prices). Meanwhile, the exports of crude oil increased by US\$ 299.6 million (owing to the rise in the exported quantities).
  - **Oil imports retreated** by US\$ 891.1 million to only US\$ 2.9 billion because of the decrease in imports of both crude oil by US\$ 937.0 million (on the back of the drop of the imported quantities and the global prices) and oil products by US\$ 96.1 million (due to the decline in the prices despite the rise in the imported quantities). Meanwhile, natural gas imports increased by US\$ 142.0 million (owing to the pickup in the imported quantities).
- **Egyptian workers' remittances retreated** by 29.9 percent to register only US\$ 4.5 billion (against US\$ 6.4 billion).
- **Investment income deficit\*** slightly **increased** by 1.1 percent to US\$ 4.6 billion (from US\$ 4.5 billion), as **investment income payments went up** by US\$ 187.2 million to US\$ 5.0 billion (against US\$ 4.8 billion) . This was despite the **improvement of investment income receipts** by US\$ 137.2 million to US\$ 413.0 million (against US\$ 275.8 million), mainly due to the higher interest on residents' deposits at banks abroad.

---

\* It represents the difference between the income earned from and paid to the external world on portfolio investments, direct investment, bank deposits, and external debt.

**The capital and financial account**\*\* revealed a net inflow of US\$ 1.8 billion during the reporting period (against US\$ 4.4 billion in the same period a year earlier), due to the following developments:

- **FDI in Egypt registered a net inflow** of US\$ 2.3 billion (against US\$ 3.3 billion), as follows:
  - **FDI in non-oil sectors achieved a net inflow** of US\$ 2.6 billion (against US\$ 3.6 billion), as net proceeds of selling local entities to non-residents realized US\$ 15.4 million (against US\$ 1.0 billion) and net reinvested earnings about US\$ 1.1 billion (against US\$ 1.4 billion). Meanwhile, net investment inflows for real estate purchases by non-residents registered US\$ 312.5 million (against US\$ 165.0 million); net inflows for greenfield investments or capital increases of existing companies recorded US\$ 993.3 million (against US\$ 975.3 million); and intercompany loans achieved a net disbursement of US\$ 108.5 million (against a net repayment of US\$ 15.0 million).
  - **FDI inflows in the oil sector stabilized at** US\$ 1.4 billion (representing new investments of foreign oil companies). Meanwhile, a slight decrease was seen in the outflows (representing the cost recovery for exploration, development and operations previously incurred by foreign partners) to record only US\$ 1.6 billion from US\$ 1.7 billion, thus **the period under review unfolded an improvement in net outflows to reach only US\$ 247.8 million** (against US\$ 320.5 million).
- **Net outflow of portfolio investment in Egypt** fell to record net outflows of only US\$ 523.4 million (against US\$ 2.2 billion).
- **The change in banks' foreign assets** registered a net outflow of US\$ 731.0 million, i.e an increase in the assets, against a net inflow of US\$ 690.5 million.
- **The change in banks' liabilities** posted a net outflow of US\$ 187.2 million, i.e a decline in the liabilities, against a net inflow of US\$ 1.7 billion.
- **The change in the CBE's liabilities** recorded a net inflow of US\$ 2.0 billion (against US\$ 652.4 million).

---

\*\* Including foreign direct investment (FDI), portfolio investment, and net external borrowing.

• Numbers expressed in US\$ billion have been rounded.
